Position: Chief Executive Officer
Reports to: Board of Directors
Location: Any major US Biotech / Pharma Market

SUMMARY OF POSTION:

Develop and lead strategic and tactical plans to attain business performance and liquidity goals in line with company and investor expectations. Retain, build, develop and lead a core team of employees, advisors, partners, vendors, and customers as needed to maximize success.

RESPONSIBILITIES:

- Support operations and administration of BOD by advising and informing Board members, interfacing between Board and staff. Provide quarterly reports to the BOD on all facets of company performance as well as overall strategic direction.
- Recruit, lead, inspire, empower, compensate, and retain talented people as needed to maximize success while observing authorized personnel policies and procedures that fully conform to current laws and regulations.
- Lead all financial, risk, legal, tax, and facility aspects of the business and operate within current policies, laws and regulations.
- Secure the operating capital as required to fuel optimal performance.
- Lead product development and the timely completion of strategically identified milestones – including compliance with all required regulatory clearances.
- Collaborate with management team to establish annual goals and objectives, secure BOD approval, and create an annual written business plan to meet or exceed such goals and objectives.
- Create and drive a strong company culture in line with company's mission, vision, and values to attract and retain top quality talent and to establish a strong brand image in the market.
- Identify exit opportunities in line with BOD guidance; lead all such planning, negotiations, deal structure, and closing while maximizing returns to shareholders.
