

## See transformational innovations in diabetes!

The [Diabetes Innovation Challenge](#) is an open competition created to support and accelerate the development of novel therapies, devices and solutions for all aspects of research, clinical care and patient quality of life in both type 1 and type 2 diabetes.

It's presented by T1D Exchange and M2D2, and supported by lead sponsors American Diabetes Association (ADA) and JDRF. The Challenge will consist of multiple events, including 2 semi-final events, a finals event and a winners showcase.

**At least two finalists will be awarded up to \$150,000 cash or in-kind services.**

## Event Details

**Semi-Finals:** There will be two events for selected semi-finalists to provide a short presentation of their later stage projects (pre-clinical through translational) or early stage projects (up to and including pre-clinical) to a panel of esteemed judges.
